

Lensing Galaxies in the CHFTLS

R. Küng et al.

- SpaceWarps
 - Citizen Science project identifying strong gravitational lenses
 - First run: 59 new candidate lenses
- SpaghettiLens
 - Web based lens modelling
 - Intuitive usage: sketch arrival time surface, direct visual feedback
- Collaborative Modelling
 - Volunteers create and revise models
 - Leads to a tree of models
- Preliminary Results
 - Stellar mass fraction of order 20 percent
